1995 Publications, by Category and Page Number

To improve utility and efficiency, we have adopted a new format for the Annual Index. The index now appears in three parts. The first, which begins below, lists publications by major category and, within categories, by page number. In order, the categories are Original Articles, Concise Communications, Editorials, SHEA Position Papers, Special Reports, Reviews, Readers' Forum, the Sections, Letters to the Editor, Abstracts, Book Reviews, and Corrections. Items published in Medical News, SHEA News, and the Calendar are not indexed.

This comprehensive list is followed by the Author Index (page 743) and the Subject Index (page 747). Each entry in these latter indices points to a major category and page number in the comprehensive list below, where the complete citaiton may be found. We have adopted this new format so that we may provide, within the available space, a much more detailed subject index in subsequent years.—*Ed.*
